About A-PDF Flash SlideShow Publisher

A-PDF Flash SlideShow Publisher is an slideshow publishing tools which provides you a easy way to adds dynamic slideshows and photo galleries to any web site you create. You can use it send your holiday wishes, upload to popular social media networkings or websites (such FaceBook) with SWF, XML and HTML as output formats. No flash skills are required.

A-PDF Flash SlideShow Publisher also help you turn digital photos into flash thumbnail gallery,flash album and flash presentation with professional designed templates, transition effects, text captions, background music, etc. It enables you to output SWF movie, Executable File, HTML file and screen saver, send by email or upload to our server for sharing online directly.

Three Steps:

Add images: Add folders of images or several ones; Sort them for output slides; Add description about every page slide; Give a link for every page of slide; Define image transition and display time; preview the output slideshow effect.

Select templates: You can define your own templates or use the build-in professional or concision ones; Insert music as background or not.

Output: Define output folder; Name out Html file and Html title; Width and height of flash; Generate flash html code for you to insert them to your home page.

A-PDF Flash SlideShow Publisher features:

1. Add photos or folders of photos;
2. Sort photos;
3. Write description about every page of images for output slideshow;
4. Insert hyperlink to every slide for triggering to go to that URL;
5. Self define image transition and display time;
6. Provides several decades of transition effects for slides;
7. Preview defined effects;
8. Enables you to self define personal templates and use the build-in ones;
9. Insert background music for slideshow;
10. Name the output file and Html file title;
11. Resize the width and height of output slideshow;

12. Finally generate flash html code for embedding into your home page.

Using A-PDF Flash SlideShow Publisher

A-PDF Flash SlideShow Publisher can be started either by launching the application via a desktop shortcut, or directly from within Windows/Windows Explorer.

When you start the program, you will be presented with the primary screen from which all actions are taken.

1. Add Photos

Clicking the **Add** icon  then will open the standard file browse and select window. From that window you can navigate to the folder and find the files you want to add to the list of photos to be worked.

Alternatively, if you are using Windows Explorer to locate files, you have the convenience of being able to 'drag and drop' files into the document window.

A-PDF Flash SlideShow Publisher even allows you to select all files in a particular directory/folder

by using the **Add Folder**  button! Adding a directory also supports sub-folders.

Each added photos file is displayed in the photo list window.

You can click the **Remove** icon  to remove selected photo in list or you can clear all photos by clicking the **Clear** icon .

2. Basic Settings
