About A-PDF Flash Word

If you always deal with a large quantity of Word reports, do you want to change a fresh and active format for those files with ease?

Or do you want to share your Word documents in a much popular and easier way? Like sharing online by publishing onto websites?

All you need to do just to use A-PDF Flash Word to convert your Word documents into Flash videos.

Flash content may be displayed on various computer systems and devices, using Adobe Flash Player, which is available free of charge for common web browsers, some mobile phones and a few other electronic devices.

Once converted to flash, anyone can easily view a PowerPoint presentation using a web browser as more than 98% of all browsers have the Adobe flash plug-in already installed. So, you are not required to install any special software or tell your audience to do the same.

A-PDF Flash Word is easy-to-use and lightning-fast software to help you to convert Word documents to popular SWF Flash movie files. The powerful converter can reserve original page layout, text, images of your word files, furthermore, it enables you to record or insert background sound, choose different transition effects, edit interactive notes, add unique page description and even attach webpage URL or file.

With using A-PDF Flash Word, you can become a Flash Pro within a few seconds. Just add Word file, choose transition effect, embed background sound, and then click "Publish" to output the edited pages into animated flash file at last.

Then, you can upload the created HTML Flash file online, and let your website visitors to read your Word reports in a popular and professional way. Or send the integrated EXE or ZIP file to someone else to let them enjoy your animated flash file.

Detail features include:

- Convert word files to flash movies.

- Provides multiple kinds of transition effects.

- Define transition time and retain time manually.

- Record audio or add MP3 file directly as background sound for each slide.

- Enable edit on added pages, such as text, graphic, highlight, etc.

- Add description for slides.

- Add attachment to output flash file.

- Define logo for adding to flash.

- Allow preview flash effect before outputting.

- Save project for later uses.

- Publish in three formats: HTML, EXE, ZIP.

  HTML allows you to upload to a website to be viewed online.
  EXE and Zip allow you to send to your user by email to be viewed on their computer.

- Provide embed code after creating flash.

Using A-PDF Flash Word

A-PDF Flash Word can be started either by launching the application via the desktop short cut , or directly from Windows Explorer.

Start the program, you will see the below initial window:
